# Special meals

# Special meals

Foodcase and our partners have worked tirelessly to create the right delicious allergen-free recipes, a dedicated free-from environment for production, distribution, and allergen guaranteed onboard experience for passengers. These meals are suitable for all travel sectors, from plane to train and cruise.

Foodcase looks to cater for the needs of the Special Meals passenger. The rise in food allergies, special dietary needs and different lifestyle choices require a new way of doing things. Many companies cannot guarantee their meals from being allergen free and have the much-maligned alibi statement or “May Contain” caveat, making them entirely unsuitable for passengers travelling with food allergies.

Our unique special meal boxes are fully biodegradable, tamper-evident and designed to be held in the freezer.

The main meal can be removed and placed in the oven. The heated meal box then inserts at the side for the cabin crew to hand to the passenger. The box has a tear strip for the passenger to open at the front, making it easier to eat.

All boxes contain a bread roll, low salt, pepper, cutlery and a napkin. All meals are gluten, nut, peanut and sesame-free and produced in an allergen-controlled environment.

# Special meals - ambient

- Reduced food waste
- Simplified non-frozen supply chain
- Same quality as a frozen meal

Ambient meals are more sustainable as you save on the immense cost, emissions and energy pollution of freezing during transit.

The meals long shelf-life reduces storage energy—along with not needing to be frozen or refrigerated, they should be stored in a dark room, reducing energy for lighting. The meals like to be starved of oxygen; I know sounds like torture, but a cool, dark dry, storage location really is best. The seals are tamper-evident.

At Foodcase our sustainability initiatives extend across our entire supply chain, starting with responsible sourcing that prioritizes locally grown ingredients, supporting local farmers and producers. This way we also reduce food miles and support vibrant, resilient communities.

The business is dedicated to reducing food waste through innovative production techniques and portion control measures.

By optimising our processes and repurposing surplus ingredients, we minimize waste.

Previously, development in retort was very much concentrated on Economy meals, but with Foodcase's modern technology and expertise, ambient meals are appropriate for premium cabin classes. We look forward to upgrading your meal options and at

the same time changing old perceptions and bringing delicious food for all budgets and culinary styles to every cabin and service.
